

Rhinoceros have completed the cleaning and painting of the soffits to the elevated section of the A40 Westway at Bramley and St Marks Roads in London W11. Following high pressure cleaning and minor concrete repairs two coats of Keim Lasur paint were applied by brush and roller using scissors lifts and a Genie G45 supplied by Nationwide. This is the second contract we have carried out for Urban Eye as project managers on behalf of the Royal Borough of Kensington & Chelsea and Transport for London.
